

Amendments to the Claims:

1. (Currently Amended) A modular oven for food products, the oven including a ~~preferably~~ self-propelled conveyor device for entraining products from an inlet to an outlet of the oven, and comprising in cascade at least two, ~~and preferably three~~, individual interchangeable modules, each individual module presenting:

- a ceiling of adjustable height that presents first air and/or steam injection means to generate forced convection;

- a floor of adjustable height that presents second air and/or steam injection means for generating forced convection;

- floor burners for baking by convection, which burners are disposed between the floor and the conveyor device and are of adjustable vertical position; and

- ceiling burners for baking by radiation, which burners are disposed between the conveyor device and the ceiling, and are adjustable in vertical position and in pointing direction.

2. (Original) A modular oven according to claim 1, wherein in each individual module the ceiling is adjustable at least between a high position and a low position.

3. (Original) A modular oven according to claim 1, wherein in each individual module the floor is adjustable between at least a high position and a low position.

4. (Currently Amended) A modular oven according to claim 1, wherein the floor burners are adjustable between at least a high position and a low position, and are ~~preferably~~ pointable in any direction.

Appl. No.: 10/528,921  
Amdt. dated November 26, 2008  
Reply to Office Action of November 17, 2008

5. (Currently Amended) A modular oven according to claim 1, wherein the ceiling burners are adjustable between at least a high position and a low position, and are ~~preferably~~ pointable in any direction.

6. (Original) A modular oven according to claim 1, wherein the burners are pointable.

7 - 12. (Cancelled)
